

Geography Complete Capsule

1. Geography Basics

- Geography = study of Earth, its physical features, people and their spatial relationships.
 - Physical Geography = landforms, climate, oceans, soils, vegetation etc.
 - Human Geography = population, settlements, migration, economic activities etc.
 - Economic Geography = distribution of resources, agriculture, industries and trade.
 - Cartography = science of map-making.
 - Climatology = study of climate.
 - Meteorology = study of atmosphere/weather.
 - Geomorphology = study of landforms.
 - Hydrology = study of water.
 - Oceanography = study of oceans.
 - Pedology = study of soils.
 - Demography = statistical study of population.
-

2. Earth

- Earth is the **third planet from the Sun**.
- Earth is approximately **4.6 billion years old**.
- Shape of Earth = **Geoid/oblate spheroid**.
- Equatorial diameter $\approx$ **12,756 km**.
- Polar diameter $\approx$ **12,714 km**.
- Equator = **0° latitude**.
- Prime Meridian = **0° longitude**.
- International Date Line = approximately **180° longitude**.
- Tropic of Cancer = **23½° N**.
- Tropic of Capricorn = **23½° S**.
- Arctic Circle = **66½° N**.
- Antarctic Circle = **66½° S**.

Earth's movements

Rotation

- Earth rotates from **west to east**.
- Takes approximately **24 hours**.
- Causes day and night.

Revolution

- Earth revolves around Sun.
 - Takes approximately **365¼ days**.
 - Causes seasons along with Earth's axial tilt.
 - Earth's axis is tilted approximately **23½°** from the perpendicular to its orbital plane.
-

3. Latitude

Important latitudes:

0° → Equator

23½° N → Tropic of Cancer

23½° S → Tropic of Capricorn

66½° N → Arctic Circle

66½° S → Antarctic Circle

90° N → North Pole

90° S → South Pole

India and Tropic of Cancer

Tropic of Cancer passes through **8 Indian states**:

Gujarat → Rajasthan → Madhya Pradesh → Chhattisgarh → Jharkhand → West Bengal → Tripura → Mizoram

Mnemonic:

“Gujju Raja MP Chhattisgarh, Jharkhand Bengal Tripura Mizoram.”

4. Longitude & Time

- Longitude lines run from pole to pole.
- All meridians meet at poles.
- Prime Meridian passes through **Greenwich, UK**.
- 1° longitude = **4 minutes** time difference.
- 15° longitude = **1 hour**.
- Earth rotates 360° in 24 hours.
- Moving east → time increases.
- Moving west → time decreases.

Indian Standard Time

- IST = **82°30' E longitude**.
- IST is **5 hours 30 minutes ahead of GMT/UTC**.
- Standard Meridian of India passes near **Mirzapur, Uttar Pradesh**.

Exam trap: Mirzapur is associated with India's Standard Meridian.

5. Interior of Earth

Three major layers:

Crust → Mantle → Core

Crust

- Outermost layer.
- Continental crust is thicker than oceanic crust.
- Oceanic crust is mainly basaltic.
- Continental crust is mainly granitic.

Mantle

- Lies below crust.
- Extends to approximately **2,900 km** depth.
- Contains hot, dense rocks.
- Convection currents in mantle are associated with plate movement.

Core

- Innermost layer.
- Mainly iron and nickel.
- Outer core = liquid.
- Inner core = solid.
- Earth's magnetic field is mainly related to movement in the outer core.

Mnemonic:

“Crust–Mantle–Core = CMC”

6. Rocks

Three major types:

Igneous

- Formed by cooling and solidification of magma/lava.
- Also called **primary rocks**.
- Example: Granite, Basalt.

Sedimentary

- Formed by deposition, compaction and cementation.
- Often contain fossils.
- Examples: Sandstone, Limestone, Shale.

Metamorphic

- Existing rocks changed by heat, pressure or chemically active fluids.
- Examples:
 - Limestone → Marble
 - Shale → Slate
 - Granite → Gneiss
 - Coal → Anthracite

7. Minerals

Metallic minerals

- Iron
- Copper
- Manganese
- Bauxite
- Mica etc.

Non-metallic

- Limestone
- Mica
- Gypsum
- Salt etc.

Important ores

- Aluminium → **Bauxite**
 - Iron → **Haematite/Magnetite**
 - Copper → **Chalcopyrite**
 - Manganese → **Pyrolusite**
-

8. Plate Tectonics

- Earth's lithosphere is divided into tectonic plates.
- Plates move over the semi-fluid asthenosphere.
- Plate movement causes earthquakes, volcanoes and mountain building.

Plate boundaries

Convergent

- Plates move towards each other.
- Can form mountains/trenches.
- Example — Himalayas.

Divergent

- Plates move apart.
- New crust may form.
- Mid-ocean ridges are associated with divergent boundaries.

Transform

- Plates slide horizontally past each other.
 - Earthquakes are common.
-

9. Earthquakes

- Sudden release of energy inside Earth causes an earthquake.
- Point inside Earth where earthquake originates = **Focus/Hypocentre**.
- Point directly above focus on surface = **Epicentre**.
- Seismograph records earthquake vibrations.
- Seismic waves:
 - P waves
 - S waves
 - Surface waves

Important

- P waves can travel through solids and liquids.
- S waves cannot travel through liquids.
- Surface waves generally cause major surface damage.

Earthquake magnitude is commonly expressed using scales such as the **Moment Magnitude Scale**; Richter scale is a historical/local magnitude scale.

10. Volcanoes

- Volcano = opening through which magma, gases and ash reach surface.
- Magma below Earth's surface.
- Lava = magma after reaching surface.

Types:

- Active
- Dormant
- Extinct

Important volcanic regions:

- Pacific Ring of Fire
- Mediterranean region
- Mid-ocean ridges

India

- **Barren Island** — India's only confirmed active volcano.
 - Located in **Andaman & Nicobar Islands**.
-

11. Mountains

Himalayas

Three major parallel ranges:

Himadri → Himachal → Shiwalik

Himadri

- Great Himalaya.
- Highest and most continuous Himalayan range.
- Contains many high peaks and glaciers.

Himachal

- Lesser Himalaya.
- Includes ranges such as Pir Panjal.

Shiwalik

- Outer Himalaya.
- Lowest Himalayan range.

Important peaks

- Mount Everest — **8,849 m approximately**
- K2 — **8,611 m**
- Kangchenjunga — **8,586 m**
- Nanda Devi — **7,816 m**

India's highest peak entirely within India → Nanda Devi

12. Important Indian Mountain Ranges

- Himalayas
- Aravalli
- Vindhya
- Satpura
- Western Ghats
- Eastern Ghats
- Nilgiri
- Cardamom Hills

Aravalli

- One of the oldest fold mountain systems.
- Extends mainly through Rajasthan toward Haryana/Delhi.

Western Ghats

- Also called **Sahyadri**.
- More continuous than Eastern Ghats.
- Important biodiversity hotspot.
- Cause orographic rainfall.

Eastern Ghats

- Discontinuous.
 - Cut by major rivers such as Mahanadi, Godavari, Krishna and Kaveri.
-

13. Indian Physiographic Divisions

India has six major physiographic divisions:

1. Himalayan Mountains
 2. Northern Plains
 3. Peninsular Plateau
 4. Indian Desert
 5. Coastal Plains
 6. Islands
-

14. Northern Plains

- Formed mainly by alluvial deposits.
- Major river systems:
 - Indus
 - Ganga
 - Brahmaputra

Important subdivisions

Bhabar

- Narrow belt along Himalayan foothills.
- Pebbles and coarse sediments.
- Streams often disappear underground.

Terai

- South of Bhabar.
- Marshy/wet region.
- Streams re-emerge.

Bhangar

- Older alluvium.

Khadar

- Newer alluvium.
- Renewed almost annually by floods.
- Generally more fertile.

Exam trap:

Bhangar = Old

15. Peninsular Plateau

- One of the oldest geological regions of India.
- Mainly composed of ancient crystalline rocks.
- Rich in minerals.

Two broad divisions:

Central Highlands

- North of Narmada.
- Includes Malwa Plateau.

Deccan Plateau

- South of Narmada.
 - Triangular plateau.
 - Black soil is widespread in parts of the Deccan Trap.
-

16. Indian Desert

- **Thar Desert.**
 - Mainly in Rajasthan.
 - Receives very low rainfall.
 - Luni is an important river of the region.
 - Sand dunes are common.
 - Vegetation is mainly xerophytic.
-

17. Coastal Plains

Western Coastal Plain

Narrower.

Divisions:

- Konkan Coast
- Karnataka Coast
- Malabar Coast

Eastern Coastal Plain

Generally wider.

Divisions:

- Northern Circars
- Coromandel Coast

Major deltas occur on eastern coast because of large east-flowing rivers.

18. Islands of India

Andaman & Nicobar

- Bay of Bengal.
- Includes volcanic **Barren Island**.
- Indira Point is in Great Nicobar.

Lakshadweep

- Arabian Sea.
 - Mainly coral islands.
 - Capital — **Kavaratti**.
-

19. Rivers of India

Two broad categories:

Himalayan Rivers

- Perennial.
- Fed by glaciers + rainfall.
- Examples:
 - Ganga
 - Yamuna
 - Brahmaputra
 - Indus

Peninsular Rivers

- More seasonal.
 - Mostly rain-fed.
 - Examples:
 - Godavari
 - Krishna
 - Kaveri
 - Mahanadi
 - Narmada
 - Tapi
-

20. Ganga River System

- Ganga originates from the **Bhagirathi** at Gangotri Glacier.
- Alaknanda and Bhagirathi meet at **Devprayag**.
- After Devprayag, the river is called Ganga.
- Ganga enters plains at **Haridwar**.
- Major tributaries:
 - Yamuna
 - Ghaghara
 - Gandak
 - Kosi
 - Gomti
 - Son
 - Ramganga

Yamuna

- Origin — **Yamunotri Glacier**
- Joins Ganga at **Prayagraj**.
- Major tributaries:
 - Chambal
 - Betwa
 - Ken
 - Sind
 - Tons

Exam trap: Ganga-Yamuna Sangam → **Prayagraj**

21. Important Peninsular Rivers

Godavari

- Largest Peninsular river.
- Called **Dakshin Ganga**.
- Origin — Maharashtra.

Krishna

- Origin — Western Ghats.
- Flows through Maharashtra, Karnataka, Telangana/Andhra region.

Kaveri

- Origin — Brahmagiri Hills, Karnataka.
- Important river of southern India.

Mahanadi

- Origin — Chhattisgarh.
- Flows into Bay of Bengal.

Narmada

- Origin — Amarkantak.

- Flows westward.
- Forms estuary rather than a large delta.
- Flows between Vindhya and Satpura ranges.

Tapi/Tapti

- Origin — Madhya Pradesh.
- Flows westward into Arabian Sea.

Important: Narmada + Tapi are major west-flowing Peninsular rivers.

22. Lakes

Important Indian lakes

- Wular — Jammu & Kashmir
- Dal — Jammu & Kashmir
- Sambhar — Rajasthan
- Chilika — Odisha
- Pulicat — Andhra Pradesh/Tamil Nadu
- Loktak — Manipur
- Vembanad — Kerala
- Kolleru — Andhra Pradesh

Special facts

- **Sambhar** → India's largest inland salt lake.
 - **Chilika** → largest coastal lagoon in India.
 - **Loktak** → famous for floating phumdis.
 - **Wular** → one of India's largest freshwater lakes.
-

23. Indian Climate

India has a **monsoon-type climate**.

Major seasons:

1. Cold weather season
2. Hot weather season
3. Southwest monsoon
4. Retreating/northeast monsoon

Southwest Monsoon

Two branches:

- Arabian Sea branch
- Bay of Bengal branch

Monsoon mechanism

Important factors:

- Differential heating of land and sea.
 - Seasonal pressure changes.
 - ITCZ movement.
 - Jet streams.
 - Himalayas.
 - ENSO and Indian Ocean conditions.
-

24. Monsoon Facts

- Kerala generally receives monsoon onset first on mainland India.
- Western Ghats cause heavy orographic rainfall.
- Meghalaya receives extremely high rainfall.
- **Mawsynram** is famous for exceptionally high rainfall.
- Rajasthan receives low rainfall because of geographical and atmospheric factors.

Rain shadow

- Area receiving less rainfall on leeward side of a mountain.
 - Example — Deccan interior east of Western Ghats.
-

25. Winds

Permanent/Planetary winds

- Trade Winds
- Westerlies
- Polar Easterlies

Local winds

- **Loo** — hot, dry summer wind of northern India.
 - **Kal Baisakhi** — violent pre-monsoon thunderstorms in Bengal/Assam region.
 - **Mango showers** — pre-monsoon rains in Kerala/Karnataka, useful for mango crops.
 - **Nor'westers** — strong pre-monsoon thunderstorms of eastern India.
-

26. Soils of India

Major soil types:

1. Alluvial
2. Black
3. Red and Yellow
4. Laterite
5. Arid/Desert
6. Forest/Mountain

Alluvial Soil

- Northern Plains.
- Highly fertile.
- Rich in potash and lime but generally relatively poor in nitrogen.
- Suitable for rice, wheat, sugarcane etc.

Black Soil

- Also called **Regur**.
- Derived from basalt.
- Excellent for cotton.
- High moisture retention.
- Develops cracks when dry.

Black → Cotton

Red Soil

- Red colour due to iron.
- Found widely in Peninsular India.

Laterite

- Heavy leaching.
- Common in high rainfall areas.
- Can support plantation crops with proper manuring.

Desert Soil

- Sandy.
- Low humus.
- Found in arid western India.

27. Agriculture

Major food crops

- Rice
- Wheat
- Maize
- Millets
- Pulses

Cash crops

- Cotton
- Sugarcane
- Jute
- Tobacco
- Tea
- Coffee

- Rubber

Rice

- Kharif crop.
- Requires high temperature and adequate water.
- Major states include West Bengal, Uttar Pradesh, Punjab, Andhra Pradesh, Telangana, Odisha, Chhattisgarh etc.

Wheat

- Rabi crop.
- Major states:
 - Uttar Pradesh
 - Punjab
 - Haryana
 - Madhya Pradesh
 - Rajasthan
 - Bihar

Sugarcane

- Long-duration tropical/subtropical crop.
 - Uttar Pradesh is a major sugarcane-producing state.
-

28. Cropping Seasons

Kharif

- Sown with monsoon.
- Harvested after monsoon.
- Examples:
 - Rice
 - Maize
 - Cotton
 - Soybean
 - Groundnut

Rabi

- Sown in winter.
- Harvested in spring.
- Examples:
 - Wheat
 - Barley
 - Gram
 - Mustard

Zaid

- Short summer season between Rabi and Kharif.
- Examples:

- Watermelon
 - Muskmelon
 - Cucumber
-

29. Green Revolution

- Major increase in foodgrain production through HYV seeds, irrigation, fertilizers and improved farming technology.
- Particularly associated with **wheat and rice**.
- In India, strongly associated with **M.S. Swaminathan**.
- Norman Borlaug is widely called the father of the **Green Revolution worldwide**.

White Revolution

- Milk production.
- Associated with **Vergheese Kurien**.
- Operation Flood.

Blue Revolution

- Fisheries/aquaculture.

Yellow Revolution

- Oilseed production.

Golden Revolution

- Horticulture/honey in different exam contexts; usually associated with horticultural growth.
-

30. Minerals of India

Coal

Major states:

- Jharkhand
- Odisha
- Chhattisgarh
- West Bengal
- Madhya Pradesh
- Telangana

Iron Ore

Major states:

- Odisha
- Chhattisgarh

- Karnataka
- Jharkhand

Bauxite

Major producers include:

- Odisha
- Gujarat
- Jharkhand
- Chhattisgarh
- Maharashtra

Mica

Major areas:

- Jharkhand
- Andhra Pradesh
- Rajasthan

31. Petroleum & Natural Gas

Major petroleum areas:

- Mumbai High
- Assam
- Gujarat
- Rajasthan
- Krishna-Godavari Basin

Important:

- **Mumbai High** — offshore oilfield.
- **Digboi** — Assam, historically important oilfield.
- **KG Basin** — major natural gas/petroleum region.

32. Industries

Iron & Steel

Important centres:

- Jamshedpur
- Bhilai
- Rourkela
- Bokaro
- Durgapur
- Visakhapatnam

Mnemonic:

“J B R B D V”

Cotton Textile

Major centres:

- Mumbai
- Ahmedabad
- Surat
- Coimbatore
- Kanpur

Jute

- Mainly West Bengal.
- Concentrated around Hooghly river belt.

IT Industry

Major centres:

- Bengaluru
- Hyderabad
- Pune
- Chennai
- Noida
- Gurugram

33. Transport

Golden Quadrilateral

Connects:

Delhi – Mumbai – Chennai – Kolkata

Major ports

West coast:

- Kandla/Deendayal
- Mumbai
- JNPT
- Mormugao
- New Mangalore
- Kochi

East coast:

- Kolkata/Haldia
- Paradip

- Visakhapatnam
- Chennai
- Ennore/Kamarajar
- Tuticorin/V.O. Chidambaranar

Natural harbour examples:

- Mumbai
 - Visakhapatnam
 - Kochi
-

34. Population Geography

Important terms:

- Birth rate = births per 1,000 population.
- Death rate = deaths per 1,000 population.
- Population density = population per unit area.
- Sex ratio = females per 1,000 males in India.
- Literacy rate = percentage of literate population as defined by census.
- Migration = movement of people from one place to another.

Migration

Push factors

- Unemployment
- Poverty
- Natural disasters
- Conflict

Pull factors

- Jobs
 - Better education
 - Healthcare
 - Higher wages
-

35. Urbanisation

- Urbanisation = increasing proportion of population living in urban areas.
- Causes:
 - Industrialisation
 - Employment
 - Education
 - Better services
- Problems:
 - Pollution
 - Traffic
 - Housing shortage

- Waste
 - Water stress
 - Slums
-

36. World Geography — Continents

Seven continents:

Asia, Africa, North America, South America, Antarctica, Europe, Australia

- Largest continent — **Asia**
 - Smallest continent — **Australia**
 - Largest ocean — **Pacific Ocean**
 - Smallest ocean — **Arctic Ocean**
 - Largest hot desert — **Sahara**
 - Largest desert overall — **Antarctic Desert**
 - Highest mountain — **Mount Everest**
 - Longest continental mountain range — **Andes**
 - Largest island — **Greenland**
-

37. Major World Rivers

- Nile — Africa
- Amazon — South America
- Mississippi-Missouri — North America
- Yangtze — China
- Ganga — India/Bangladesh
- Danube — Europe
- Volga — Europe/Russia

Amazon

- South America.
- Largest river by discharge.
- Amazon Basin has world's largest tropical rainforest region.

Nile

- Africa.
 - Historically regarded as world's longest river, though measurements can vary depending on methodology.
-

38. Major World Mountains

- Himalayas — Asia
- Andes — South America
- Rockies — North America

- Alps — Europe
 - Atlas — Africa
 - Appalachians — North America
 - Urals — Europe-Asia boundary region
-

39. Major Deserts

- Sahara — Africa
- Arabian — Asia
- Gobi — Asia
- Kalahari — Africa
- Atacama — South America
- Thar — India/Pakistan
- Great Victoria — Australia
- Antarctic Desert — Antarctica

Atacama → one of the driest non-polar deserts on Earth

40. Ocean Currents

Warm currents

- Gulf Stream
- North Atlantic Drift
- Kuroshio
- Brazil Current
- Agulhas Current

Cold currents

- Labrador Current
- California Current
- Peru/Humboldt Current
- Benguela Current
- Canary Current

Important:

- **Peru/Humboldt Current → Atacama dryness + rich fisheries**
 - **Gulf Stream → warming effect on Western Europe**
-

41. El Niño & La Niña

El Niño

- Abnormal warming of central/eastern tropical Pacific Ocean.
- Can influence global weather.

- Often associated with weaker Indian summer monsoon, though relationship is not absolute every year.

La Niña

- Abnormal cooling of central/eastern tropical Pacific.
 - Often associated with stronger Indian monsoon conditions.
-

42. Important Geographical Phenomena

- Earthquake → sudden tectonic energy release.
 - Volcano → magma reaches surface.
 - Tsunami → large sea waves usually caused by undersea earthquake or displacement.
 - Cyclone → rotating low-pressure storm.
 - Tornado → violently rotating column of air extending from thunderstorm toward surface.
 - Drought → prolonged deficiency of precipitation.
 - Flood → overflow/submergence due to excess water.
 - Landslide → downslope movement of rock/soil.
 - Glacier → large persistent mass of moving ice.
-

43. Important Map-Based Facts

Countries crossed by Equator

- Ecuador
- Colombia
- Brazil
- São Tomé and Príncipe
- Gabon
- Republic of Congo
- DR Congo
- Uganda
- Kenya
- Somalia
- Indonesia
- Kiribati

Countries crossed by Tropic of Cancer

Important ones:

- Mexico
- Bahamas
- Western Sahara
- Mauritania
- Mali
- Algeria
- Niger
- Libya
- Egypt
- Saudi Arabia

- UAE
 - Oman
 - India
 - Bangladesh
 - Myanmar
 - China
 - Taiwan
-

44. UP Geography — Very Important for AHC

Physical divisions of UP

Major regions:

- Western Uttar Pradesh
- Central/Ganga-Yamuna Plain
- Eastern Uttar Pradesh
- Terai region
- Bundelkhand
- Vindhyan region

Main rivers

Ganga

Yamuna

Gomti

Ghaghara

Rapti

Ramganga

Chambal

Betwa

Ken

Son

Important river identification

- Yamuna + Ganga → **Prayagraj**
- Gomti → **Lucknow**
- Chambal → **Etawah region**
- Betwa → Bundelkhand
- Ken → Bundelkhand
- Ghaghara → Eastern UP
- Rapti → Gorakhpur region

45. UP Soils

Major soils:

- Alluvial soil — most widespread.
- Terai soil — northern foothill region.
- Black soil — Bundelkhand/Vindhyan areas.
- Red/yellow soil — southern parts.
- Usar/Reh/Kallar soils — saline/alkaline problem soils.

Agriculture of UP

Major crops:

- Wheat
- Rice
- Sugarcane
- Potato
- Pulses
- Oilseeds
- Maize

Western UP → Sugarcane

Eastern UP → Rice

Central/Western UP → Wheat

46. UP Irrigation & Dams

Important projects:

- Rihand Dam
- Matatila Dam
- Ramganga Dam
- Rajghat Dam

Rihand Dam

- River — **Rihand**
- Location — Sonbhadra region.
- Reservoir — **Govind Ballabh Pant Sagar**.

Matatila Dam

- River — **Betwa**
- Bundelkhand region.

Rajghat Dam

- River — **Betwa**
 - UP-MP region.
-

47. UP Mineral & Industrial Geography

Sonbhadra

- Coal
- Power generation
- Minerals
- Major thermal power plants.

Kanpur

- Leather
- Textile
- Engineering industries.

Moradabad

- Brassware.

Firozabad

- Glass industry.

Aligarh

- Lock industry.

Meerut

- Sports goods.

Varanasi

- Silk/textiles.

Bhadohi

- Carpets.

Kannauj

- Perfume/attar.

Noida/Greater Noida

- Electronics
- IT
- Manufacturing
- Data/technology ecosystem.

48. Geography One-Liner Revision

- Equator → **0°**
- Prime Meridian → **0°**
- Tropic of Cancer → **23½° N**
- Tropic of Capricorn → **23½° S**
- IST → **82°30' E**
- Earth's rotation → **West to East**
- Rotation → **Day and night**
- Revolution → **Year/seasons**
- Nearest layer to Earth → **Crust**
- Outermost atmospheric layer → **Exosphere**
- Ozone layer → **Stratosphere**
- Weather occurs mainly in → **Troposphere**
- India's standard meridian → **82°30' E**
- Standard Meridian passes near → **Mirzapur**
- Highest peak → **Everest**
- Highest peak entirely within India → **Nanda Devi**
- Active volcano of India → **Barren Island**
- Largest Indian river basin → **Ganga basin**
- Dakshin Ganga → **Godavari**
- West-flowing major rivers → **Narmada & Tapi**
- Largest Peninsular river → **Godavari**
- Old alluvium → **Bhangar**
- New alluvium → **Khadar**
- Black soil → **Cotton**
- Laterite → **Heavy rainfall/leaching**
- Kharif → **Monsoon**
- Rabi → **Winter**
- Zaid → **Summer**
- Green Revolution → **Food grains**
- White Revolution → **Milk**
- Blue Revolution → **Fisheries**
- Golden Quadrilateral → **Delhi-Mumbai-Chennai-Kolkata**
- Largest ocean → **Pacific**
- Largest continent → **Asia**
- Largest island → **Greenland**
- Largest hot desert → **Sahara**
- Largest desert overall → **Antarctica**
- Driest major non-polar desert → **Atacama**
- UP's major sugarcane belt → **Western UP**
- UP's major Bundelkhand rivers → **Betwa/Ken**
- Rihand reservoir → **Govind Ballabh Pant Sagar**

49. 15 Must-Remember Geography Traps

1. **Bhangar = old alluvium; Khadar = new alluvium.**
2. **Narmada and Tapi flow westward.**
3. **Godavari = largest Peninsular river.**
4. **Ganga is formed at Devprayag from Bhagirathi + Alaknanda.**
5. **Yamuna joins Ganga at Prayagraj.**
6. **Barren Island = active volcano in India.**
7. **Black soil = cotton.**

8. **Loo = hot, dry summer wind.**
9. **IST = 82°30' E.**
10. **1° longitude = 4 minutes.**
11. **Western Ghats are more continuous than Eastern Ghats.**
12. **Chilika = large coastal lagoon.**
13. **Sambhar = inland salt lake.**
14. **Mawsynram = exceptionally high rainfall.**
15. **Thar = major Indian desert.**
